

CHRISTOPHER M. BUERCK, P.E.
Project Manager

B.S. Civil Engineering (Cum Laude) – 1997 University of Missouri – Columbia

Registered Professional Engineer (PE) in Missouri

EXPERIENCE HISTORY

February 2002 to Present –

Project Manager for Bowen Engineering & Surveying, Cape Girardeau, Missouri. Responsibilities include design and construction engineering services for municipal roadway and bridge projects and residential and commercial planning and site development. Other work includes overseeing soil and concrete testing laboratory and providing inspection services for commercial construction projects.

May 1997 to February 2002 –

Staff Engineer for Bowen Engineering & Surveying, Cape Girardeau, Missouri. Responsible for production of subdivision development plans including watershed modeling and analysis, storm water management, sanitary sewer and waterline design and roadway layout and design. Assisted in on-site concrete testing and inspection services and construction management for municipal bridge and roadway projects.

December 1995 to May 1997 –

Engineer Assistant for City of Columbia Public Works Department, Street Division, Columbia, Missouri. Responsible for researching and developing “Non-Technical Bridge Inspection Manual” for Street Division personnel to use for routine bridge inspections.

October 1994 to May 1997 –

Design Tech and Survey Technician for Allstate Consultants, Columbia, Missouri. Responsible for assisting in design of residential streets and sanitary sewer systems for subdivision development and improvements. Also, completed survey field work on an as-needed basis.
